### Experience

#### Apprentice Studios / Web Designer

April 2017 - Present Boise, Idaho

Provides design and development services on contract to small to medium-sized businesses and nonprofit organizations through Apprentice Studios, a graphic, print and web design studio in Boise, Idaho. Work primarily focuses on WordPress design and administration, WooCommerce, and custom site design and implementation.

#### Tincup Design / Freelance Web Designer

March 2016 - Present Nashville, Tennessee

Provides web consulting, design and development services to small to medium-sized businesses. A certified developer in HubSpot's COS environment, services are provided to SEO and inbound marketing company Search Strategy Marketing (Santa Cruz, CA) to provide comprehensive services for the HubSpot platform, Wordpress administration, and custom-built web sites.

#### NTM, Inc. / Project Implementation Manager

July 2015 - March 2016, Fremont, California

Worked closely with new and existing clients to manage enterprise software installations and upgrades, and with the software team as a junior developer. Software development responsibilities included implementing product customizations in Javascript and jQuery, as well as database modifications in Oracle and Visual Foxpro. Also performed complete overhaul of all user documentation for core company product which included updating existing content as well as the addition of new material oriented towards administrators and power-users. Authored a collection of development-oriented processes and bug fixes to address absence of internal product documentation.

#### Vanderbilt University Medical Center/ Systems Analyst

July 2012 - January 2015, Nashville, TN

Created a new Informatics-affiliated technology support group, determining SLAs, policy and service delivery. At the conclusion of Informatics project, hired by pilot department as a Systems Analyst

tasked with managing enterprise application suite including the TOPAZ and eSirius research protocol, inventory, and finance management systems. Handled problem management for all additional LoB applications supporting regulatory workflows, finance and facilities operations. Performed server deployments, migrations, enterprise application installations and upgrades. Initiated and managed project to deploy web-based image processing application and associated 15TB backend storage component for department-affiliated research lab.

### **Indiana Univ. - ACT Research Center / Information Sys. Manager**

July 2008 - June 2012, Bloomington, Indiana

Managed purchasing, rollout and upkeep of all technology-related equipment including servers, network printers, workstations/laptops and GPS equipment and provided 24x7 IT support for center principals. Redesigned, built and launched new Cascade-based website featuring research news feed and publication library.

### **SAIC, Inc. / Sharepoint Architect**

October 2007 - July 2008, Crane, Indiana

Responsible for administration of SharePoint 2007 environment at the Naval Surface Warfare Center - Crane, providing data repositories and collaboration sites for over 4000 active users. Provided consultation, planning and implementation of SharePoint sites and was designated project coordinator for legacy application consolidation and migration into SharePoint. Authored and taught regular week-long SharePoint classes at both NSWC Crane and Fallbrook Naval Weapons Station. These classes ranged in skill-level from beginner to site administrator and several hundred base employees completed the courses.

### **Indiana University School of Ed. / Systems Administrator**

August 2006 - October 2007, Bloomington, Indiana

Administered 18 Windows 2003 servers including SharePoint 2003 and 2007 application and database servers. Managed code repository for SharePoint development team as well as server-related development, QA and production tasks. Helped design and implement a SharePoint-based knowledge store which hosted IT-related documentation and resources for IU School of Education employees and faculty.

### **Concept Technology, Inc. / Field Engineer**

November 2004 - August 2006, Nashville, Tennessee

Interacted with a wide variety of Nashville-area small and medium-sized businesses providing them with comprehensive IT support from desktop and server administration to network architecture and disaster recovery. Worked closely with business owners and decision makers to plan and implement new network deployments, hardware refreshes and software installations and upgrades and provided ongoing support that covered clients' homes as well as when they traveled.

### **Applied Materials, Inc. / Executive Support Coordinator**

August 1999 - August 2004, Santa Clara, California

Filled the role of Desktop Support Technician during first 3 years of tenure administering Windows workstations, associated CAD and LoB

applications, related peripherals and network printers for over 300 users. Responsibilities were eventually extended to cover support for executive staff of new business development group and staffing the Desktop Support Group. Promoted to Remote Help Desk team leader in 2002 and was tasked with extending remote support coverage to all Santa Clara campuses. Promoted to Executive Support Coordinator in 2003. Worked closely with corporate officers, internal support groups and vendors to coordinate 24x7 IT support for 20-person executive core covering all Applied campuses, international travel, and home networks. Managed team that handled hardware refreshes, software/hardware upgrades and home networking needs for 165-person executive group.
